

Accelerate New Employee Productivity

Integrate Onboarding

An Integrated Business Use Case

“Ineffective and inefficient onboarding process impacts new employee perception of the company.”

Challenges:

- Too much time spent researching and qualifying candidates.
- Tasks to onboard employees are disconnected and inefficient.
- Takes too long for hired candidates to be enabled and productive.

Executive Summary:

- Shorten the time to fill open positions by streamlining the process from job posting through hiring.
- Integrate the onboarding process from HR including paperwork, training, security and benefits.
- Reduce the time for new employees to become productive.

“The key to modernizing HR is about customizing, quantifying and maximizing the employee/candidate experience.”¹

Helping Clients Become an Integrated Business

Integrate HR Data and Applications:

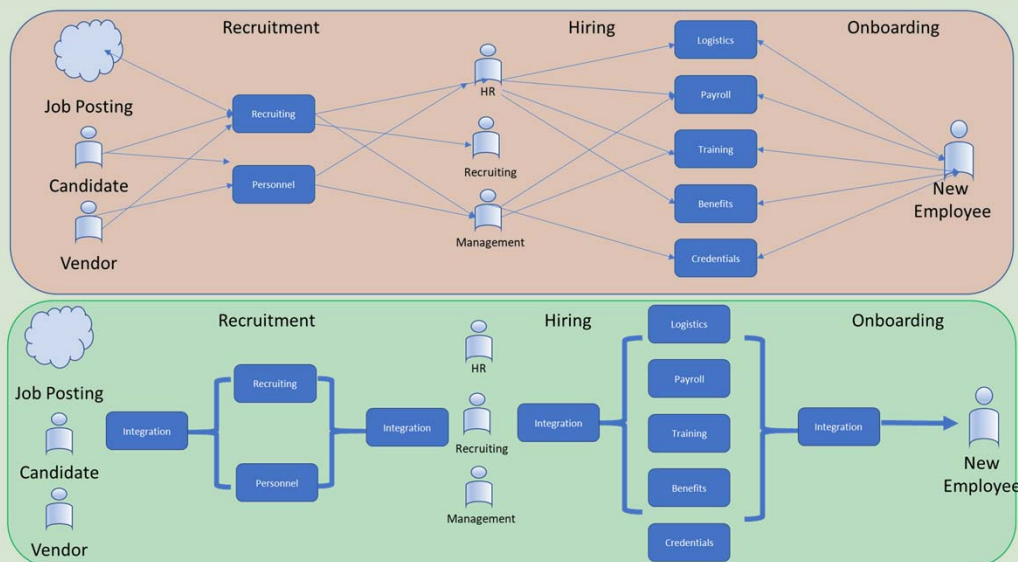

- Provide an integrated process from posting job opportunities through interviewing and hiring.
- Improve external integration with recruiters and job posting systems.
- Create an integrated view across applications such as HR, payroll, benefits, and training.

“More than a third (36%) of HR professionals we surveyed said that integrating their core HR system with other people management or business solutions would help them to spend less time on administration.”³

Accelerate New Employee Productivity:

“Companies can achieve a synergistic effect between hiring proceedings and orientation/induction mechanisms in order to streamline them altogether.”⁴

- Integrate onboarding steps to improve efficiency from payroll, information security, benefits enrollment and training.
- Remote access for new employee paperwork.
- Provide an integrated view of onboarding progress for HR personnel.
